

# CobraMatic Cam Locks

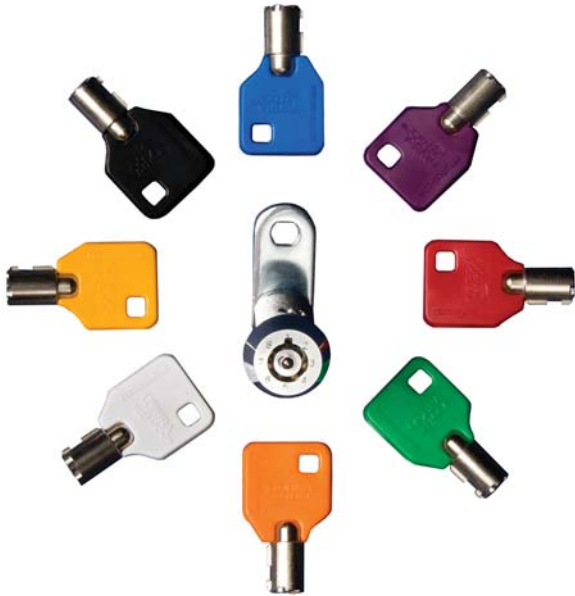

All Cobramatic Series locks feature 8 key code changes designed so that the user can change the key code while the lock is still mounted with no outward visual indication of what the current key code is.

All Cobramatic 7 Series 8-change cam locks provide a higher level of security adding an improved anti-drill ball positioned in the center of the spindle and a 7 sided spindle and 7 sided key to match.

The Cobramatic 7 keys are only available from Locking Systems.

The original Cobramatic series provides the ability to continue current systems from other manufacturers.

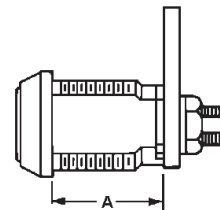

Contact us to get additional information on this and other Cobra locks that can provide additional security at reasonable prices.
