

Padlocks

Maximum Security PL342 & 362 Series

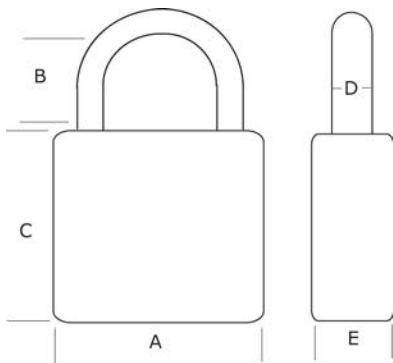

Abloy® case-hardened steel body provides protection for high security applications with a case-hardened steel shackle protector, making this padlock virtually impregnable against attack by prying and cutting tools.

All Abloy® padlocks use unique rotating disc cylinders and offer maximum key control with maximum security. Abloy® padlocks can be masterkeyed with several million combinations available. Abloy® padlocks are highly resistant to wear, dirt, moisture, corrosion and freezing.
