

Key Control

New patents and strict control procedures protect against unauthorized duplication of keys.

Physical Security

Stronger components and UL 437 approved design protect against physical attack such as drilling and cutting.

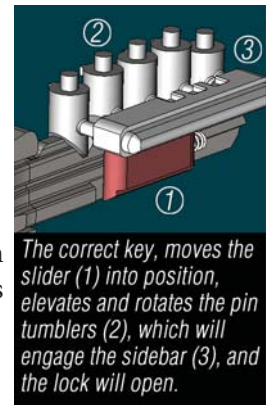

Virtually Pickproof

The Medeco3 technology requires precise interaction between the lock and key making the lock highly resistant to all forms of non-forced attack.

Extensive Keying Capabilities

Three locking elements work together inside the Medeco3 lock to create billions of unique key codes.

Medeco 3 Locks are manufactured to NAMA Standards and will fit most T- Handles.

ME-6470 Medeco 3 with Spring Bolt

ME-6472 Medeco 3 with Dead Bolt
