Locking Systems International awarded U.S. Patent on its line of Cobra 7 Locks

Locking Systems International has been awarded a U.S. Patent on its Cobra 7 and CobraMatic 7 line of locks. Locking Systems International designed the Cobra 7 Series locks around the unique irregular 7-sided front and matching key. All together 16 claims were awarded under this patent.

The Cobra 7 locks increase the security over standard tubular locks by the unique seven sided front and matching key. Standard tubular keys will not fit into the Cobra 7 locks and the Cobra 7 keys are tightly controlled and only available from Locking Systems International or one of its service centers.

The Cobra 7 locks are available in the Cobra 7 Series, CobraMatic 7 Series, Universal Padlock Series and the new FLEX Padlock Series.

Founded in 1994, Locking Systems International, Inc is a manufacturer and distributor of many different types and styles of locks and locking systems. LSI manufactures the Cobra 7 and the CobraMatic 7 cam locks and vending locks, and is a leading distributor and service center for Abloy and Medeco.

For additional information call 1.800.LOCK (5625) or email sales@lockingsystems.com, you can also visit our web sites at www.lockingsystems.com or www.cobralock.com.
