January 12, 2010

## Locking Systems International releases new FLEX™ Padlock

Locking Systems International has released a new padlock in its line of solid steel padlocks. The new FLEX™ Padlock gives the user the ability to change the lock cylinder themselves. The FLEX™ Padlock expands our line of user changeable padlocks following the highly successful Universal PUCK padlock. All padlocks are manufactured under the Cobra Lock brand by Locking Systems International Inc. and are available direct from LSI or one of our Service Centers.

The FLEX™ Padlock has a patent pending design that will allow the user to change the security of the padlock as easy as changing the lock cylinder. This padlock was designed to use standard 7/8 inch cam lock cylinders such as Abloy, Medeco or Cobra cam lock

cylinders. The body is made of solid steel and is hardened for maximum strength and security. The TF8500 comes with a 1 inch hardened steel shackle and the TF8520 comes with a 2 inch hardened steel shackle. The shackles are interchangeable and can be changed by the end user.

Founded in 1994, Locking Systems International, Inc is a manufacturer and distributor of many different types and styles of locks and locking systems. LSI manufactures the Cobra 7 and the CobraMatic 7 cam locks, Cobra vending locks and Cobra Padlocks.

Locking Systems International is a leading distributor and service center for all Abloy and Medeco locks.
